Safety Guidelines

Chewable Products and Chewies

⚠ CAUTION All Fun and Function chewable products are for therapeutic use only and they should not be considered toys. Please read these Safety Guidelines and the product insert before using your chewy. Consult with your pediatrician or therapist for oral motor guidance.

Using Your Chewy

- Adult supervision is always required when using chewable products and chewies
- Caregiver should have knowledge of each child's unique needs and developmental capabilities. Some children require additional supervision for their own safety
- Caregiver should teach child how to correctly use the chewy
    - Only mouth the chewable portion
    - Do not chew on necklace cords or clasp
- Necklace cords have a safety clasp to prevent strangulation and to break away when pulled on. Never use if safety clasp is broken
- Remove chewy before active play, naptime and bedtime

Inspecting Your Chewy

- No product is indestructible. Before each use, inspect chewy and cord for signs of wear and tear
    - If the user has aggressive biting or chewing habits, inspect more frequently
- Immediately discard and replace
    - Any chewy that shows signs of discoloration, cracking, or any other signs of deterioration or damage
    - Any cord that shows signs of fraying, thinning, breakage or damage

Caring for Your Chewy

- After use, hand wash or surface wash the chewable product according to the care instructions provided. Air dry.
- Some chewable products are dishwasher safe, top rack. Check specific product information or email us at customercare@funandfunction.com

About Our Chewies

- Our chewy products have been tested to withstand varying levels of pressure, for at least 2000 repetitive cycles
- Chewable product durability may depend on the oral sensory needs of the child, as well as oral habits. If the user has aggressive biting or chewing habits, choose a higher durability chewy and inspect more frequently

At Fun and Function, safety is our priority. If you have questions about how to safely use this product or any Fun and Function chewable product, please contact us at customercare@funandfunction.com.

Safety Guidelines

Sensory Room Products

(Including SensaSoft™, Bubble Tubes, Tactile Wall Panels and Fiber Optics)

⚠ CAUTION All Fun and Function sensory products are for therapeutic use only and they should not be considered toys. Equipment is highly specialized and is not a toy. Please read these Safety Guidelines and the product insert before using your sensory room products.

Installing Your Sensory Room Products

Read the product insert thoroughly for proper installation instructions.

- Sensory room products are for indoor use only, unless otherwise specified
- Permanent installations should be done by a professional installer
    - A professional is a certified construction professional, in compliance with applicable regulations in the province, state or country where the product is installed. We recommend that you find a professional with appropriate licensing and proof of liability insurance coverage. Installer must follow standard safety practices for installation as outlined in the product insert
- To prevent tip over and fall hazards, appropriate installation hardware must be used, including required brackets and anchors
- Ensure any electrical cords and outlets are secure and inaccessible to users

Using Your Sensory Room Products

Adult supervision is always required when using sensory room products.

- Consult with your pediatrician or therapist to confirm that the user's developmental abilities are correctly matched to the equipment
- Tip over and fall hazard: ensure all equipment is properly anchored

Inspecting and Maintaining Your Sensory Room Product

- Inspect equipment prior to each use
- Carry out a routine safety check at regular intervals to inspect all components including padded structures, LED components, fiber optic strands and liquid filled chambers
- Discontinue use immediately if product exhibits wear and tear or damage
- Keep product inserts in an accessible place so all users are familiar with proper use and inspection requirements

About Our Sensory Room Products

- Sensory room products meet all applicable safety requirements for flammability*, banned phthalates, lead, and physical and mechanical hazards. Electronic components are UL certified for safety. (*Check your jurisdiction's building code requirements)

At Fun and Function, safety is our priority. If you have questions about how to safely use this product or in choosing appropriate sensory room products, please contact us at customercare@funandfunction.com.

Safety Guidelines

Swing and Suspension Products

⚠ CAUTION All Fun and Function products are for therapeutic use only and they should not be considered toys. Please read these Safety Guidelines and the product insert before using your swing or suspension product. Consult with your physician or therapist for motor skills guidance or if user is ill, injured, has respiratory difficulty, or has unique physical or developmental needs.

Using Your Swing or Suspension Product

Active eyes-on adult supervision is required when using all swings and suspension products.

- ⚠ WARNING Fall and strangulation hazards may occur if products are used incorrectly
- Most hammock swings are for gentle rocking and not active swinging
- Remove or secure swing away from children after each use. Children may become entangled and injured in swing ropes, soft fabric and hammock swings
- Ensure that child is within an appropriate weight range for the product's intended use
- Ensure that protective floor mats of appropriate thickness are installed under and 6 feet from the perimeter of the equipment

Installing Your Swing or Suspension Product

Read the product insert thoroughly for proper installation instructions.

- Swings and suspension products are for supervised indoor use only unless specified. Choose a location where there is a minimum clearance of 6 feet around the perimeter of the swing, unless other distance is specified
- For doorway bar installations that do not permit a 6-foot clearance, only 2-point suspension products can be used
- Permanent installations should be done by a professional installer
    - A professional is a certified construction professional, in compliance with applicable regulations in the province, state or country where the product is installed. We recommend that you find a professional with appropriate licensing and proof of liability insurance coverage. Installer must follow standard safety practices for installation as outlined in the product insert
- Ensure appropriate hardware is used, including Fun and Function rotational devices, swivels or two-to-one converters. For single-point suspension, use with swivel. Hardware requirements are specified in each product listing and instructions
- Extend protective floor mats of appropriate thickness under and 6 feet from the perimeter of the equipment

Inspecting and Maintaining Your Swing or Suspension Product

- Inspect equipment prior to each use
- Carry out a routine safety check at regular intervals to inspect all components including fabric, rope, carabiners and attachment points on both the product and building structure
- Discontinue use immediately if product exhibits wear and tear or damage
    - Regular wear and tear is expected of all components, including but not limited to eyebolts, carabiners, O-rings, hooks, swivels, chains and ropes
    - Replacement parts can be purchased directly from Fun and Function
- Keep product inserts in an accessible place so all users are familiar with proper use and inspection requirements

About Our Swings and Suspension Products

- Swing and suspension products have been tested for physical and mechanical hazards, load bearing and weight capacity. Weight capacity differs depending on product and installation method

At Fun and Function, safety is our priority. If you have questions about how to safely use this product or in choosing an appropriate swing, suspension products or associated hardware, please contact us at customercare@funandfunction.com.

Safety Guidelines
Gel-Filled Products

⚠ CAUTION All Fun and Function gel-filled products are for therapeutic use only and they should not be considered toys. Please read these Safety Guidelines and the product insert before using your gel-filled products. Consult with your pediatrician or therapist for developmental and motor skills guidance.

Using Your Gel-Filled Products

Adult supervision is required when using all gel-filled products including hand-held, floor and seat products.

- Gel-filled products can become a hazard if product is pierced or damaged
- Gel-filled products should never be chewed on, ingested or swallowed
- Follow the age guidelines stated on the product insert

Inspecting Gel-Filled Products

- Inspect gel-filled products prior to each use
- Discard gel-filled products that show tears, gel leaks, wear at edges and punctures

Caring for Gel-Filled Products

- Never heat or cool any gel-filled product unless specified in instructions. Temperature extremes can compromise product safety
- Gel-filled products are not designed to be thrown or dropped with excessive force
- Keep sharp objects away from product. Do not puncture or cut into gel-filled products
- Surface wash and air dry. Products can be washed with mild disinfectant if required
- Keep product inserts in an accessible place so all users are familiar with proper use and inspection requirements

About Our Gel-Filled Products

- This gel-filled product, including the outer and inner materials, meets all applicable safety requirements for lead, phthalates, physical and mechanical properties, and flammability
- Gel is non-toxic. User should drink water if swallowed. If gel gets in eyes, flush eyes with water. As when any non-food item is swallowed or gets in eyes, call a doctor

At Fun and Function, safety is our priority. If you have questions about how to safely use this product or in choosing appropriate gel-filled products, please contact us at customercare@funandfunction.com.

Safety Guidelines
Putty Products

⚠ CAUTION All Fun and Function putty products are for therapeutic use only and they should not be considered toys. Please read these Safety Guidelines and the product insert before using your putty products. Consult with your pediatrician or therapist for developmental and motor skills guidance.

USING YOUR PUTTY PRODUCTS

Provide active, eyes-on adult supervision so child avoids putting putty in ear, hair, on furniture, appliances, clothing or carpeting.

- Putty products containing small parts can become a choking hazard. Putty products are NOT recommended for children under 3 years of age. Follow the age guidelines stated on the product insert
- Putty products are not intended for mouthing or chewing and should NEVER be ingested or swallowed
- Store putty products away from children after each use

Inspecting Putty Products

- Inspect putty products prior to each use
- Look for wear and tear, cleanliness or material breakdown. Replace as needed

Caring for Putty Products

- Never heat any putty product. Temperature extremes can compromise product safety
- Keep product inserts in an accessible place so all users are familiar with proper use and inspection requirements

About Our Putty Products

- Putty products come in different resistance levels: extra soft/soft/medium/firm. Resistance level reflects user's specific needs, such as muscle tone or sensory needs. Consult your therapist for guidance
- This putty product meets all applicable safety requirements for lead and physical and mechanical hazards

At Fun and Function, safety is our priority. If you have questions about how to safely use this product or in choosing appropriate putty products, please contact us at customercare@funandfunction.com.

Safety Guidelines
Seated Scooters

⚠ CAUTION All Fun and Function products are for therapeutic use only and they should not be considered toys. Please read these Safety Guidelines and the product insert before using your scooter. Consult with your physician or therapist for motor skills guidance or if user is ill, injured, has respiratory difficulty, or has unique physical or developmental needs.

Using Your Seated Scooter

Active eyes-on adult supervision is required when using all seated scooters.

- Allow only one rider at a time
- Do not exceed the weight capacity indicated on the product insert
- Fall hazard: Do not allow child to stand on the seated scooter. Never allow child to use seated scooters on or near stairs or other hazards
- Store seated scooters away from children after each use

Inspecting and Maintaining Your Scooter

- Some scooters require assembly. Follow directions as outlined in the product insert
- Inspect equipment prior to each use for cracks, breaks or irregular wear
- Carry out a routine safety check at regular intervals to inspect all components including wheels/casters and body of scooter
- Discontinue use immediately if product exhibits wear and tear or damage
    - Some regular wear and tear is expected. Replacement wheels can be purchased directly from Fun and Function
- Scooters are for indoor use only
- Surface wash. Air dry
- Keep product inserts in an accessible place so all users are familiar with proper use and inspection requirements

About Our Scooters

- Scooters meet all applicable safety requirements for physical and mechanical hazards, lead and phthalates
- Weight capacity and recommended age range differs depending on product. See product insert for details

At Fun and Function, safety is our priority. If you have questions about how to safely use this product or in choosing an appropriate scooter, please contact us at customercare@funandfunction.com.

Safety Guidelines

Weighted Clothing & Products (Excluding Blankets)

(Including Vests, Lap Pads, Belts, Bean Bags, Hats and Other Therapeutic Items)

⚠ CAUTION All Fun and Function weighted products are for therapeutic use only and they should not be considered toys. Please read these Safety Guidelines and the product insert before using your weighted products. Consult with your pediatrician or therapist for developmental and motor skills guidance.

Using Your Weighted Products

- Adult guidance is recommended when using all weighted clothing and products. Stop use if user reports fatigue, pain or any discomfort
- Follow the age and weight guidelines
    - User should be at least 3 years of age, unless age guidelines state otherwise
    - Weight should be adjusted for each user's needs
        - 10% of total body weight is a recommended standard
        - Total weight should never exceed 10% of total body weight
- Weighted products should be incorporated into use gradually
    - Begin by wearing the product with lower weights and for short periods of time (e.g. 10 - 20 minutes) and then removing the weight
    - The amount of time the product is worn and the amount of weight added to the product can be increased gradually, as directed by a professional, such as an occupational therapist
- Only one weighted product should be used at a time
- Do not allow user to sleep in weighted clothing. Only weighted blankets are suitable for sleep
- User should be able to remove weighted product without help
- Consult physician before using if user is ill, injured, has respiratory difficulty, or has unique physical or developmental needs
- Never use to restrict movement, restrain or cover user's face

Inspecting Your Weighted Products

- Inspect weighted products prior to each use. Inspect both the outer product and inner weighted portion if removable
- ⚠ WARNING: Choking hazard. Look for loose stitching, ripped seams, fraying, torn or worn areas that may release weighted filling
- If product is damaged, immediately stop use until it is properly repaired or replaced

Caring for Your Weighted Products

- Follow cleaning instructions as outlined on the product insert. Some products can be machine or hand washed, others are surface clean only. Air dry
- Keep product inserts in an accessible place so all users are familiar with proper use and inspection requirements

About Our Weighted Products

- This weighted product has been tested for lead, phthalates, physical and mechanical properties, cleanliness and flammability
- The product is designed and manufactured for long-term durability for our most active users

At Fun and Function, safety is our priority. If you have questions about safe play, safe practices, or choosing appropriate weighted products, please contact us at customercare@funandfunction.com.

Safety Guidelines
Weighted Blankets

⚠ CAUTION All Fun and Function weighted blankets are for therapeutic use only. Consult with your pediatrician or therapist for developmental and motor skills guidance.

Using Your Weighted Blanket

Adult guidance is recommended when using all weighted blankets. Stop use if user reports fatigue, pain or any discomfort.

- Follow the age and weight guidelines
    - User should be at least 3 years of age
    - Weight should be adjusted for each user's needs
        - 10% of total body weight is a recommended standard
        - Total weight should never exceed 10% of total body weight
- User should be able to remove blanket without help
- Consult physician before using if user is ill, injured, has respiratory difficulty, or has unique physical or developmental needs
- Never use more than one weighted product at a time
- Never use to restrict movement, restrain or cover user's face
- Never use in a crib

Inspecting Your Weighted Blanket

- Inspect weighted blanket prior to each use
- ⚠ WARNING: Choking hazard: Look for loose stitching, ripped seams, fraying, torn or worn areas that may release weighted filling
- If blanket is damaged, immediately stop use until it is properly repaired or replaced

Caring for Your Weighted Blanket

- Machine or hand wash in cold water depending on product recommendation. Air dry
- Keep product inserts in an accessible place so all users are familiar with proper use and inspection requirements

About Our Weighted Blankets

- This weighted blanket has been tested for lead, phthalates, physical and mechanical properties, cleanliness and flammability
- The product is designed and manufactured for long-term durability for our most active users

At Fun and Function, safety is our priority. If you have questions about safe play, safe practices, or choosing appropriate weighted products, please contact us at customercare@funandfunction.com.

Safety Guidelines

Stretch Fabric Products

(Including Spandex Therapy Tools, Transformer Sensory Sack, Hug Sleeping Bag and Other Therapeutic Items; Excluding Stretch Clothing)

⚠ CAUTION All Fun and Function stretch fabric products are for therapeutic use only and they should not be considered toys. Please read these Safety Guidelines and the product insert before using your stretch fabric products. Consult with your pediatrician or therapist for developmental and motor skills guidance.

Using Your Stretch Fabric Products

Adult supervision is required when using all stretch fabric products.

- ⚠ WARNING Fall hazard:
  - Never suspend a person in a stretch product/spandex sensory tool or wrap around feet
  - Use extra caution on uncovered floors. Smooth material is slippery
  - Use appropriate spotting techniques when a person is in the spandex sensory tool
- ⚠ Suffocation hazard: Do not cover head for prolonged periods of use
- Only compression snuggle sheets and sleeping bags are suitable for sleep. Do not use other stretch fabric products for sleep
- Follow the age and size guidelines stated on the product insert

Inspecting Your Stretch Fabric Products

- Inspect stretch fabric products prior to each use
- Look for loose stitching, ripped seams, fraying, torn or worn areas
- If product is damaged, immediately stop use until it is properly repaired or replaced

Caring for Your Stretch Fabric Products

- Handwash and air dry unless otherwise specified
- Keep product inserts in an accessible place so all users are familiar with proper use and inspection requirements

About Our Stretch Fabric Products

- Stretch fabric products have been designed to support children with various sensory needs
- This stretch fabric product meets all applicable safety requirements for physical and mechanical properties, flammability and seam strength
- The product is designed and manufactured for long-term durability for our most active users

At Fun and Function, safety is our priority. If you have questions about how to safely use this product or in choosing an appropriate stretch fabric product, please contact us at customercare@funandfunction.com.

Safety Guidelines

Bean Bag and Foam Filled Products

(Including Bean Bag Chairs, Crash Pads, Mushy Smushy and Mini Mushy Smushy Products)

⚠ CAUTION All Fun and Function bean bag products are for therapeutic use only and they should not be considered toys. Please read these Safety Guidelines and the product insert before using your bean bag products. Consult with your pediatrician or therapist for developmental and motor skills guidance.

Using Your Bean Bag Chair/Mushy Smushy

Adult supervision is required when using all bean bag products.

- ⚠ WARNING Suffocation and choking hazard:
  - Children can suffocate if face is pressed into bean bag
  - Children can suffocate or choke on bean bag filling if accessed
  - Children under 2 should never be placed on or around bean bag products
  - Bean bag products should never be used for sleeping
- Children should never be allowed to play underneath bean bag products or climb inside bean bag product covers
- Follow the age and size guidelines stated on the product insert - most are for ages 3 and older

Inspecting Bean Bag Products

- Inspect bean bags prior to each use
- Look for exposed filling, loose stitching, ripped seams, fraying, torn or worn areas that may release filling. If product has zipper cover, ensure zipper is working functionally
- If product is damaged, do not use until it is repaired or replaced

Caring for Your Bean Bag Products

- Spot wash and air dry
- If product has removable cover, cover can be washed and air dried. Cover can only be removed using a tool, such as a paperclip. No zipper pull is included to prevent children from crawling inside of bean bag. After washing, ensure cover and zipper are firmly reaffixed so child cannot access inside of bean bag
- Keep product inserts in an accessible place so all users are familiar with proper use and inspection requirements
- Keep sharp objects away from bean bag to avoid puncturing

About Our Bean Bag Products

- Bean bag products have been designed to support children with various sensory needs
- This bean bag product has been tested for physical and mechanical properties, flammability and seam strength
- The product is designed and manufactured for long-term durability for our most active users

At Fun and Function, our family's safety is our priority. If you have questions about safe play, safe practices, or choosing appropriate bean bag products, please contact us at customercare@funandfunction.com.

Safety Guidelines
Climbing Wall Products

⚠ CAUTION All Fun and Function products are for therapeutic use only and they should not be considered toys. Please read these Safety Guidelines and the product insert before using your climbing wall product. Consult with your physician or therapist for motor skills guidance or if user is ill, injured, has respiratory difficulty, or has unique physical or developmental needs.

Using Your Climbing Wall Product

- ⚠ WARNING Fall hazard: Serious personal injury, disfigurement or death may occur due to the inherent risks associated with climbing
- Active eyes-on adult supervision is required when using all climbing wall products
- Choose products and hardware with an appropriate weight range for the product's intended use
- Close climbing wall areas from child access when supervised use is concluded

Installing Your Climbing Wall Product

- With any of our products which require installation and which bear full or partial weight of the user (e.g., swings, climbing walls, etc.), we strongly recommend that these products be installed by a qualified individual and/or by a professional installer. If the products detach from a ceiling and wall, death or serious injury can occur. For example, it is possible that an installer may not properly use mounting screws affixed to the ceiling beam or wall structure (wood studs, metal studs or masonry) or that "hollow wall" or other anchors may be incorrectly used. These installations could fail
- To prevent this hazard, a qualified person must install the products, as indicated in the instructions
    - A qualified individual has a good understanding of the ceiling or wall structure where the product is to be anchored, including the positioning of the wall studs and structural components in the case of a wood or metal structure
- If the structure of the ceiling or wall is not a wood stud, metal or masonry or if the installer has any doubt about how or where to anchor the products, then the service of a professional is absolutely required for anchoring the products
    - A professional is a certified construction professional, in compliance with applicable regulations in the province, state or country where the product is installed. We recommend that you find a professional with appropriate licensing and proof of liability insurance coverage
- If you have any doubt about installation requirements, do not attempt to install the product. Please contact us with requests for returns

Inspecting and Maintaining Your Climbing Wall Product

- Inspect equipment – including the safe placement of fall mats – prior to each use
- Carry out a routine safety check at regular intervals to inspect all components including climbing holds and attachment points on both the product and building structure
- Discontinue use immediately if product exhibits wear and tear or damage
    - Some amount of ordinary wear and tear is expected of all components, including but not limited to climbing holds and screws. Replacement parts can be purchased directly from Fun and Function
- Keep product inserts in an accessible place so all users are familiar with proper use and inspection requirements

About Our Climbing Wall Products

Climbing wall products have been tested for physical durability, mechanical hazards and weight capacity. Weight capacity differs depending on product and installation method.

At Fun and Function, safety is our priority. If you have questions about how to safely use this product or in choosing an appropriate climbing wall, please contact us at customercare@funandfunction.com.
