

Optimize Learning to Support All Students

Our Online Professional Development

- Bundled packages with online training and classroom sensory toolkits
- PDU credit and certificates for professionals who successfully complete the online training units

Features of Our Online Training

Our courses are created by an experienced team of therapists and educators. Each course has:

- Flexible structure to progress at your own pace
- Key information about sensory processing as the foundation for learning
- Interactive features and quizzes to retain knowledge
- Practical strategies to address unique student needs
- Integration with our [Break Box](#), a collection of sensory tools

Course Syllabus

Title: Sensory Foundations of Learning and Behavior

Professional Development Contact Hours: 1.5 (90 minutes)

Audience: School Personnel, including teachers, paraprofessionals, school psychologists, and social workers

Course Creators: Dr. Kathy Klein, OTD, OTR, Adina Steinberg, OTR/L and Goldie Grossman, Ed. D.

Short Summary: In this session, participants explore how sensory processing is foundational to learning and behavior. The course describes the use of sensory tools to support sensory needs and promote student learning.

Learning Outcomes:

1. Identify and analyze the different components of behavior
2. Describe how sensory processing is foundational to learning
3. Describe how sensory processing difficulties can present as challenging behaviors
4. Describe how sensory tools support sensory needs
5. Create a plan to introduce and use your Break Box in the classroom
