under 3 years.

3+ years

Congratulations on the purchase of your Portable LED Bubble Tube!

The Portable LED Bubble Tube has been designed specifically for people with special needs and should, if used in accordance with these guidelines, offer years of fun!

The Portable LED Bubble Tube is designed to calm and relax an individual in certain settings.

It is the brightest LED Bubble Tube currently available (at time of print) and produces multiple shades of colors when used in Portable mode.

Please ensure you read and follow these Instructions carefully before operating the unit. Please keep this manual for future reference.

Features

- Ergonomic design
- Latest LED technology. No changing bulbs.....EVER!
- Clear acrylic lid
- Molded plastic base
- Low voltage transformer – supplied
- Easy maintenance
- Durable
- Easy to use
- 1 Year Manufacturers Guarantee (Collect and Return)

Pack contents

- 1 x Portable LED Bubble Tube
- 1 x Clear acrylic Lid
- 1 x Low Voltage Transformer

Getting Started

1. Remove all packaging including clear film around the tube. Please note, the tube may contain a small amount of water, this is from our testing process, and completely normal.
2. Place the Portable LED Bubble Tube on a flat solid floor.
3. Carefully fill the bubble tube with water from the top. If you spill any water, please ensure this is cleaned immediately. Do not fill the tube to the top; allow 3-4 inches (150mm) from the water level to the top of the tube.
4. Plug the small, round end of the transformer into the receptacle on the base. Connect the standard 110v AC plug to a nearby outlet.
5. The Bubble Tube will now illuminate and begin scrolling through many colors.

Please note: Use only the transformer supplied. Use of a different transformer may result in damage to the product and void the warranty.

Cleaning and Maintenance

The unit should be cleaned with a damp soft cloth. A non abrasive cleaning agent may be used for stubborn stains. Be sure no liquid enters the base of the unit.

The unit has been designed for use by people with special needs, however this does NOT mean it is unbreakable. You must be sure the unit is not hit with anything and that no one pulls or pushes the unit.

Changing Bubble Tube Water

All bubble tubes require that the water in them be changed every 4 – 6 weeks to slow the build up of any bacteria.

To change the water in an Experia LED Bubble Tube located within a soft padded platform, please follow these instructions.

1. Remove the lid off the column.
2. Use a length of hose (4 yards minimum for a 80" column) to siphon the water out of the column into a bucket. Empty the bucket and repeat.

Note: We recommend wrapping a towel around the base of the clear column before removing the water. In the event of a spill, this offers a little extra protection against water entering the base.

Tip: To **make this process easier**, you can purchase an Experia pump kit online at www.experia-usa.com and type "pump" into the search box.

Alternatively....the portable bubble tube is small and lightweight. You can simply carry the bubble tube to a nearby sink and dump the water out. However.....you must be careful to keep water from running over the edge and back down the tube into the base. Again, we recommend that you wrap the column in a towel, and turn it over fast enough so the water does not run down the outside of the column.

Troubleshooting

Q. The unit doesn't work.

- A1. Is it switched on? If so,
- A2. Has the unit scrolled through its colors? If so,
- A3. Please contact us for further assistance.
